

## PB INNOVATION

Mr. Ron Grigaras,  
Engineering Manager

MHG Asia Pacific is part of the MH Group of Companies, a privately owned diversified group of businesses founded in 1970 by our Chairman Steve Haritos. The origins of the business commenced with the importation of prestige automobiles, automotive and motorcycle accessories.

MHG move into manufacturing was made in 1975 to produce exterior decorative products for the automotive aftermarket. In 1977 MHG commenced production of Australia's first injection-moulded motorcycle helmets. In the same year, MHG won our first Original Equipment Manufacturer (OEM) contract to supply body side mouldings for Chrysler Australia. Over the ensuing 35 years, MHG Asia Pacific has developed the reputation as a leading Tier One OEM supplier to the automotive industry.

In 2009, MHG Asia Pacific acquired the automotive glass operations of CSR Limited (ASX: CSR) to become the sole manufacturer of OEM automotive glass in Australia.

Today, MHG Asia Pacific has operations in Australia and Thailand and employs more than 280 staff in the Asia Pacific region.

Within Thailand Racking Systems are the most flexible unit for material storage solutions, with adjustable configurations available for space saving, offering heavy payload storing for MHG.

Using many difference pallets sizes, MHG considered the racking dimension D1100 x L2400 x H1375 to meet packing height 1200 mm., each packing payload rated at 500 kg , competitively priced to allow a racking payload of 2 tons per level. Of course, the racking system needs good leveling to stand alone flat, one arrangement used here, pallet 22 units on racks (total space for 32 pallets bays) anchored to floor, primarily will be used for fork truck lift slide in/out materials racking.

MHG (Thailand) considered PB INNOVATION to be their supplier for racking system based on competitive pricing and flexible solutions offered.

More information and enquiry regarding to racking systems please kindly contacts PB INNOVATION.
